**Optimized SMID Cap Core Composite** contains fully discretionary SMID core equity accounts and for comparison purposes is measured against the Russell 2500 Index. The product typically has fewer than 100 holdings and a predicted tracking error target range of 5% - 8% vs. Russell 2500. The Optimized SMID Core Composite was created on December 15, 2010. The Optimized SMID Core Composite's inception date is 10/31/07. This composite was renamed on September 30, 2012 to better reflect the true strategy of the product. Formerly, the composite was named "Optimized Mid Cap Core vs. S&P Midcap Composite". This composite changed its benchmark on September 30, 2012 from the S&P Midcap to the Russell 2500 because the latter benchmark better represents the investable universe of the product.

Results are based on fully discretionary accounts under management. Accounts that are no longer with the firm are included through the last full measurement period such accounts were managed in the composite's style. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance.

Internal dispersion presented is an equal-weighted standard deviation of annual gross returns of those portfolios that were in the composite for the entire year. For those years when less than six portfolios were included in the composite for the full year, no dispersion measure is presented.
